

Hungry Planet Statistics

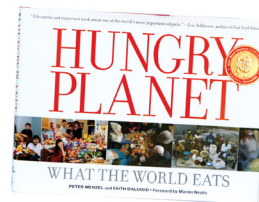

[illegible]

Statistics for Individual Countries

The figures in the table above arise from the book *Hungry Planet***, which was released in 2005. Figures are collected in 2002-05, during the preparation of the book. In the intervening period there have been changes, but by and large, the latter's picture of a planet with vast differences in lifestyles and living conditions remain unchanged in 2015.

The book *Hungry Planet* has no Danish family portrait – therefore the Danish figures are collected separately. The Danish figures for sugar and sweetened, doctors, GDP, purchasing power parity, and smokers are from 2002-05. Other figures are from 2005-10.

Sources of the Danish data are: Statistics Denmark, UNDP, FAO/STAT, WHO, McDonald's, *Rockwell Foundation*, the Danish *Nutrition Foundation*.
